

ACRYLIC SEALANT

Description:

Acrylic sealant is one component is a one component multipurpose smooth paste and non sag sealant. Especially recommended for filling gaps and cracks of static joints with an excellent ratio of plasticity and elasticity.

Properties: It is paintable, can be used on porous surfaces like wood, concrete, etc., Exhibits strong water proof seal once cured.

PARAMETER	TEST METHOD	VALUES
Base		Acrylic Dispersion
Consistency		Soft Paste
Ph		7-9
Specific Gravity	(ASTM D 792)	1-6 – 1.65 Gms/ Cm3
Tack-free time	(ASTM C 679)	15 min
Maximum Elongation	(ASTM D 412)	100%
Temperature Resistance		-10°C TO + 80°C
Application Temperature		+5°C to + 35°C

Applications: Suitable for low and medium expansion joints of various building materials, filling cracks on walls and ceilings. Sealing of joints of doors and windows.

Packing: 310 ML x 25 pcs per box

Colors: White/Black/Grey/Brown. (Other colors upon request)
