

## FIRESTOP - SS

### Description :

Firestop-SS mastic is a one component sodium silicate based which offers resistance to temperature of up to 1500°C. This is an industrial sealant, wherein products manufacture demand exposure to continuous high temperatures.

**Properties :** Firestop-SS has quick hardening properties and is solvent free. It does not crack or peel while exposure to high temperatures.

PARAMETER	TEST METHOD	VALUE
Base		Sodium Silicate
Consistency		Paste
Density	(ASTM D 792)	1.9 gms/cm <sup>3</sup>
Temperature Resistance		-30°C to + 1500°C
