

PUR WOOD ADHESIVE

Description :

Wood adhesive is a water resistant moisture curing PUR adhesive specially suitable for wood, woodworking and joinery workshops. This is also suitable for bonding to galvanize iron, metals, sanded expanded polystyrene with wood or stone.

Properties : It is based on PUR adhesive. It offers good adhesion to many substrates with a heat resistance up to 120°C

PARAMETER	TEST METHOD	VALUES
Appearance		Dark Brown Liquid
Solid Content		100%
Viscosity		700 ^o cPs at 20 ^o C
VOC Content	Percent	Approximate 15
Water Resistance Class	(DIN EN204)	D3
Coverage		100-200 g/m ²
Open Time	@ 25 ^o C	Approximate 30 Minute
Working Time		Approximate 90 minutes
Foaming		Slight Foaming

Applications: Wood, Wood working, joinery, suitable for bonding of hard wood and tropical wood species

Packing: 500 gms HDPE bottle
20 kg pails
