

SILICONIZED ACRYLIC SEALANT

Description:

Siliconized Acrylic is a one component multipurpose smooth paste and non sag sealant with high ratio of plasticity and elasticity.

Properties: It can withstand weather conditions with longer flexible life and is also paintable with Density of 1.55-1.65 and 40 shore A Hardness.

PARAMETER	TEST METHOD	VALUES
Base		Acrylic
Consistency		Soft Paste
Ph		7-9
Specific Gravity	(ASTM D 792)	1-4 – 1.5 Gms/ Cm ³
Tack-free time	(ASTM C 679)	12 - 15 min
Maximum Elongation	(ASTM D 412)	100%
Temperature Resistance		-10°C TO + 80°C
Application Temperature		+5°C to + 35°C

Applications : It is suitable for filling gaps, cracks and joints for both interior and exterior applications It can be used on various substrates brick/concrete/wood . Specially recommended for windows & doors, PEB

Packing : 290 ML Cartridge 25 Pcs in a box

Colors : White/Black
