Product Overview:

Description: Ceramic fiber fabrics are woven from ceramic fibers, providing flexible, lightweight insulation material. Ideal for applications requiring large surface coverage, they are commonly used in welding curtains, expansion joints, and insulation covers.

Technical Specifications:

| Specification | Test Result |
|-----------------------|---|
| Material Composition: | High-purity alumina-silica ceramic fibers with optional reinforcement (e.g., stainless steel or fiberglass) |
| Temperature Range: | Up to 1260°C (continuous); up to 1425°C (peak) |
| Thickness Range: | 1mm to 6mm |
| Width Range: | Up to 1500mm |
| pH Range: | 0 - 14 |

Applications:

Welding curtains, expansion joints, insulation covers, thermal barriers

Key Benefits:

- Excellent heat and thermal insulation properties.
- Provides effective thermal protection in high-temperature zones.
- Suitable for custom fabrications and large surface insulation.
